The Dai-ichi Life Insurance Company, Limited

## Dai-ichi Life to Invest in Green Bonds Issued by JR TT

The Dai-ichi Life Insurance Company, Limited (the “Company”; President and Representative Director: Seiji Inagaki) hereby announces that it has made an investment in green bonds issued by the Japan Railway Construction, Transport and Technology Agency (“JR TT”).

Green bonds are issued to raise funds for green projects. The green bonds issued by JR TT were the first to be verified by the Ministry of the Environment for conforming to the “Green Bond Guidelines, 2017<sup>1</sup>”. The guidelines were formulated and publicly released by the Ministry of the Environment in March 2017.

The funds from the green bonds will be allocated to the Urban Railway Convenience Enhancement Project (the Eastern Kanagawa Lines). This project is expected to reduce CO<sub>2</sub> emissions as more passengers choose the enhanced railway lines instead of traveling by car or bus. In addition to securing stable returns through investing in the green bonds, the Company supports this environmentally friendly project through financing, and by regularly following up on the progress of the project.

The Company continues to improve its investment returns through the enhancement and diversification of its investment methods, while proactively expanding ESG investment<sup>2</sup> in an effort to contribute to creating a sustainable society as a responsible institutional investor.

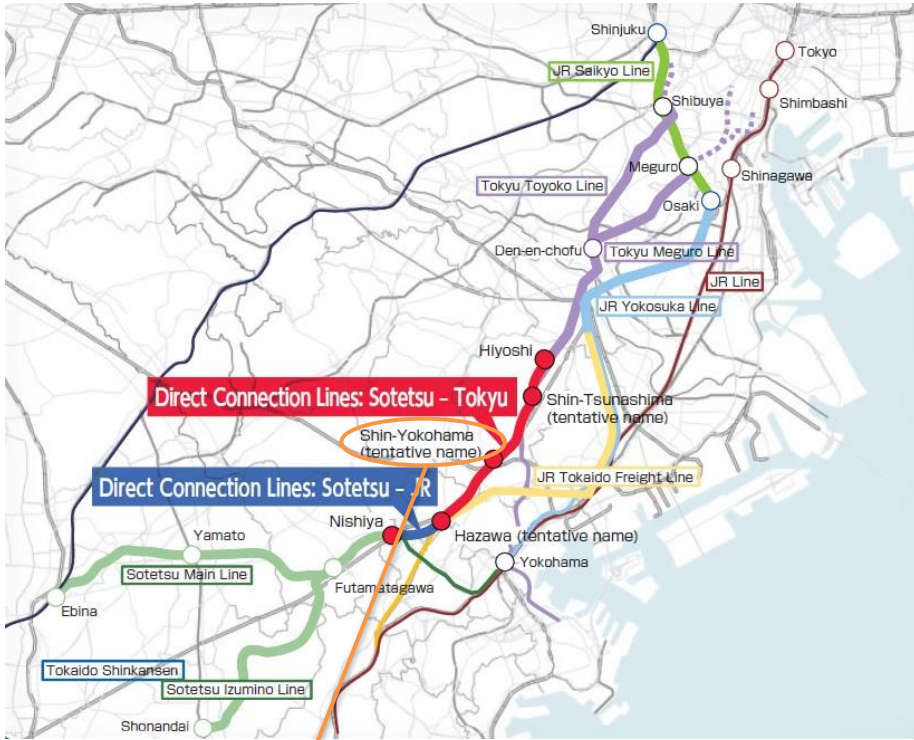

### <Overview of Green Bonds Issued by JR TT>

Name	Japan Railway Construction, Transport and Technology Agency Bonds, 109 <sup>th</sup> Series
